NumPy Exercises

Now that we've learned about NumPy let's test your knowledge. We'll start off with a few simple tasks, and then you'll be asked some more complicated questions.

Import NumPy as np

```
In [1]:
```

```
import numpy as np
```

Create an array of 10 zeros

```
In [2]:
```

```
np.zeros(10)
```

Out[2]:

```
array([0., 0., 0., 0., 0., 0., 0., 0., 0.])
```

Create an array of 10 ones

```
In [3]:
```

```
np.ones(10)
```

Out[3]:

```
array([1., 1., 1., 1., 1., 1., 1., 1., 1., 1.])
```

Create an array of 10 fives

```
In [4]:
```

```
np.full(10,5.)
```

Out[4]:

```
array([5., 5., 5., 5., 5., 5., 5., 5., 5., 5.])
```

Create an array of the integers from 10 to 50

```
In [5]:
```

```
np.arange(10,51)
```

Out[5]:

```
array([10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50])
```

Create an array of all the even integers from 10 to 50

In [6]:

```
np.arange(10,51,2)
```

Out[6]:

```
array([10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50])
```

Create a 3x3 matrix with values ranging from 0 to 8

In [7]:

```
np.arange(0,9).reshape(3,3)
```

Out[7]:

```
array([[0, 1, 2],
[3, 4, 5],
[6, 7, 8]])
```

Create a 3x3 identity matrix

In [8]:

```
np.eye(3,3)
```

Out[8]:

Use NumPy to generate a random number between 0 and 1

In [0]:

```
np.random.rand(1)
```

Out[15]:

```
array([ 0.42829726])
```

Use NumPy to generate an array of 25 random numbers sampled from a standard normal distribution

```
In [0]:
```

Create the following matrix:

```
In [0]:
```

```
np.arange(0.01,1.01,0.01).reshape(10,10)
Out[35]:
array([[ 0.01, 0.02, 0.03, 0.04, 0.05, 0.06, 0.07, 0.08,
                                                                 0.09,
1],
               0.12.
       [ 0.11,
                      0.13,
                             0.14,
                                     0.15,
                                           0.16,
                                                   0.17, 0.18,
                                                                 0.19.
                                                                        0.
2],
       [ 0.21,
               0.22,
                       0.23,
                             0.24,
                                     0.25,
                                            0.26,
                                                   0.27,
                                                          0.28,
                                                                 0.29,
                                                                        0.
3],
       [ 0.31,
               0.32,
                       0.33,
                             0.34,
                                     0.35,
                                            0.36,
                                                   0.37,
                                                         0.38,
                                                                 0.39,
                                                                        0.
4],
       [ 0.41,
               0.42,
                       0.43,
                             0.44,
                                     0.45,
                                            0.46,
                                                   0.47, 0.48,
                                                                 0.49,
                                                                        0.

                                     0.95,
                                           0.96,
                                                  0.97, 0.98,
]])
```

Create an array of 20 linearly spaced points between 0 and 1:

```
In [0]:
```

```
np.linspace(0,1,20)
Out[36]:
array([ 0.
                    0.05263158, 0.10526316, 0.15789474,
                                                          0.21052632,
        0.26315789,
                    0.31578947,
                                0.36842105, 0.42105263,
                                                           0.47368421,
        0.52631579,
                    0.57894737,
                                 0.63157895,
                                              0.68421053,
                                                           0.73684211,
        0.78947368,
                    0.84210526, 0.89473684,
                                                                     ])
                                              0.94736842,
                                                           1.
```

Numpy Indexing and Selection

Now you will be given a few matrices, and be asked to replicate the resulting matrix outputs:

```
In [0]:
mat = np.arange(1,26).reshape(5,5)
mat
Out[38]:
array([[1, 2, 3, 4, 5],
       [6, 7, 8, 9, 10],
       [11, 12, 13, 14, 15],
       [16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
In [0]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [0]:
mat[2:,1:]
Out[40]:
array([[12, 13, 14, 15],
       [17, 18, 19, 20],
       [22, 23, 24, 25]])
In [0]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [0]:
mat[3][4]
Out[41]:
20
In [0]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
```

BE ABLE TO SEE THE OUTPUT ANY MORE

```
In [0]:
mat[0:3,1:2]
Out[42]:
array([[ 2],
       [7],
       [12]])
In [0]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [0]:
mat[4:,:]
Out[46]:
array([21, 22, 23, 24, 25])
In [0]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [0]:
mat[3:,:]
Out[49]:
array([[16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
```

Now do the following

Get the sum of all the values in mat

```
In [0]:
np.sum(mat)
Out[50]:
325
```

Get the standard deviation of the values in mat

In [0]:

np.std(mat)

Out[51]:

7.2111025509279782

Get the sum of all the columns in mat

In [0]:

np.sum(mat,axis=0)

Out[53]:

array([55, 60, 65, 70, 75])

Type *Markdown* and LaTeX: $lpha^2$
